

Solution Requirements

Date	09-07-2026
Team ID	SWTID-2026-2082
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Only authorized users (Business Analyst/Admin) can access the Tableau dashboard.	High
2	Authorization levels	Business Analyst can analyze data and create dashboards. Operations Manager can view reports and insights	High
3	External interfaces	Import data from Excel/CSV files into Tableau for analysis and visualization.	High

4	Transactions processing	Process order details such as Order ID, Order Value, Delivery Fee, Cuisine, Meal Type, City, and Delivery Time.	High
5	Reporting	Generate interactive dashboards showing order trends, cuisine preferences, city-wise demand, delivery performance, and customer spending.	High
6	Business rules, etc.	Analyze only valid records, calculate KPIs correctly, and filter data by city, cuisine, and meal type.	Medium
7	Compliance to laws or regulations	Ensure customer data privacy and use data only for analysis purposes.	Medium
8	Other	Provide filtering, sorting, and drill-down features for better business insights.	Low

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria

1	Performance & Speed	Dashboard should load and respond quickly.	Dashboard loads in less than 3seconds.
2	Scalability	<i>[Describe user experience standards and accessibility compliance]</i>	Handles 100,000+ records without performance issues.
3	Security & Data Privacy	Protect data from unauthorized access	Password-protected access and secure data storage.
4	Reliability & Availability	Dashboard should be available whenever required.	99% availability during project usage.
5	Usability & Accessibility	System should support large datasets.	Easy navigation with filters and charts.
6	<i>Other</i>	Maintainability and compatibility.	Works with the latest Tableau Desktop/Public versions and can be updated easily.
