

Solution Architecture

Date	09-07-2026
Team ID	SWTID-2026-2082
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	5 Marks

Solution Architecture Diagram:

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
 Presentation Layer	Displays interactive dashboards, charts, KPIs and filters for users to analyze food ordering behavior and consumer trends.	Tableau Desktop / Tableau Public
API Gateway	Not applicable for this project as data is processed directly in Tableau.	
 Core Logic Service	Performs data cleaning, data transformation, analysis, KPI calculations and creates visualizations in Tableau.	Tableau, Microsoft Excel
External API Integrations	Connects to data source files (Excel/CSV) for importing food ordering data.	Microsoft Excel, CSV Files
Database (Data Layer)	Stores raw food ordering data used for analysis and dashboard creation.	Excel (.xlsx), CSV Files
